About MemeLuck

Welcome to #MEMELUCK – where chance and innovation combine.

MEMELUCK is a unique style in the cryptocurrency industry that aims to change the meme coin ecosystem by combining chance and innovation.

Problem:

Most meme tokens are used as speculative assets with little or no inherent utility. They rely heavily on hype and marketing and do not contribute much value to their holders or the blockchain ecosystem in general. This lack of utility and value proposition makes these projects unsustainable in the long run and leaves investors vulnerable to market volatility and potential losses.

Solution:

Our approach with MEMELUCK is to transcend the traditional limitations of meme tokens by introducing multiple purposes of utility. The token serves not only as a currency but also as a key to unlock various benefits and opportunities within the MEMELUCK ecosystem.

Our commitment to transparency, security, community engagement, and the revolutionary revenue-sharing model creates an ecosystem where every participant is not just a user but an essential part of the journey.

Why MemeLuck?

Not only has Web 3.0 given rise to a new type of community, but a new type of money. New and emerging forms of currency exist within the world of digital assets, with bitcoin currently standing as the most successfully decentralized, provably scarce, hard, digital money. While governments have decided for centuries what is money, the advent of digital assets has put the power back in the hands

of the people. Though not all cryptocurrencies will stand the test of time, and many will experience extreme levels of volatility in their rise to prominence, technological developments and the rise of digitally native generations indicate that multiple digital currencies will be adopted and will become integral to the broader crypto asset ecosystem.

Within this new form of money exists dog money, or a cryptocurrency depicted by an image of a dog and backed by a loyal community. Although Dogecoin (DOGE) holds rank as the first (and most successful) dog money in existence, DOGE is not the first time that money has been depicted in the image of a dog. The first appearance of a canine on money started in the Greek city of Cyzicus in 450 BCE, with others following suit over the next several centuries.

This phenomenon seems outlandish and "bubble-like" to outsiders looking in. However, history and the emerging trends of Web 3.0 suggest that, in the future, we can and should expect different

types of money to exist. While some will inevitably serve as a better store of value and medium of exchange, it's unlikely that cryptocurrencies will converge to a "winner-take-all" market. Therefore, as this new form of money evolves, one ought

to consider which new forms of dog money have the best chance of coming out on top and how they differentiate from peers.

MEMELUCK is set to lead the charge on Web 3.0 community building and prove to the world that we're the most efficient and hardest of Meme in existence.

Holding \$MMLU tokens not only means you are part of the meme new industry but also makes you eligible for unique benefits. It is a tool with real and tangible utility, providing benefits to both investors and the community in general. One of the most exciting perks is participating in amazing and multiple raffles.

We recognize and reward our growing community. Through rewards programs, airdrops, and special events, we seek to foster a vibrant and engaging environment.

As we take off on this exciting journey, MEMELUCK invites you to try your chance. Experience the future of raffles where chance is not just a game of luck but an engaging and rewarding adventure.

We provide an online raffling platform that offers customers the chance to win amazing prizes.

#MEMELUCK is here! Don't miss out on our AMAZING Raffles!

Memeluck Token

Memeluck Token \$(MMLU)

A \$MMLU Token is an ERC20 token developed on the Ethereum Blockchain that ensures the security and transparency of transactions. This allows for reliable tracking of funds and efficient distribution of resources.

The renowned OpenZeppelin framework has been used as a guideline to build the Memeluck token. OpenZeppelin is an industry-proven technical standard that ensures more uniformity and by applying its best practices reduces common pitfalls and mitigates risks. In short, it makes the Memeluck token safe and up in arms for usage.

MMLU can be sent, spent, saved, or traded through the blockchain. Moreover, it can be stored in any compatible ERC20 wallet (i.e. Metamask, Trust Wallet, MEW, Ledger, etc).

Tokenomics

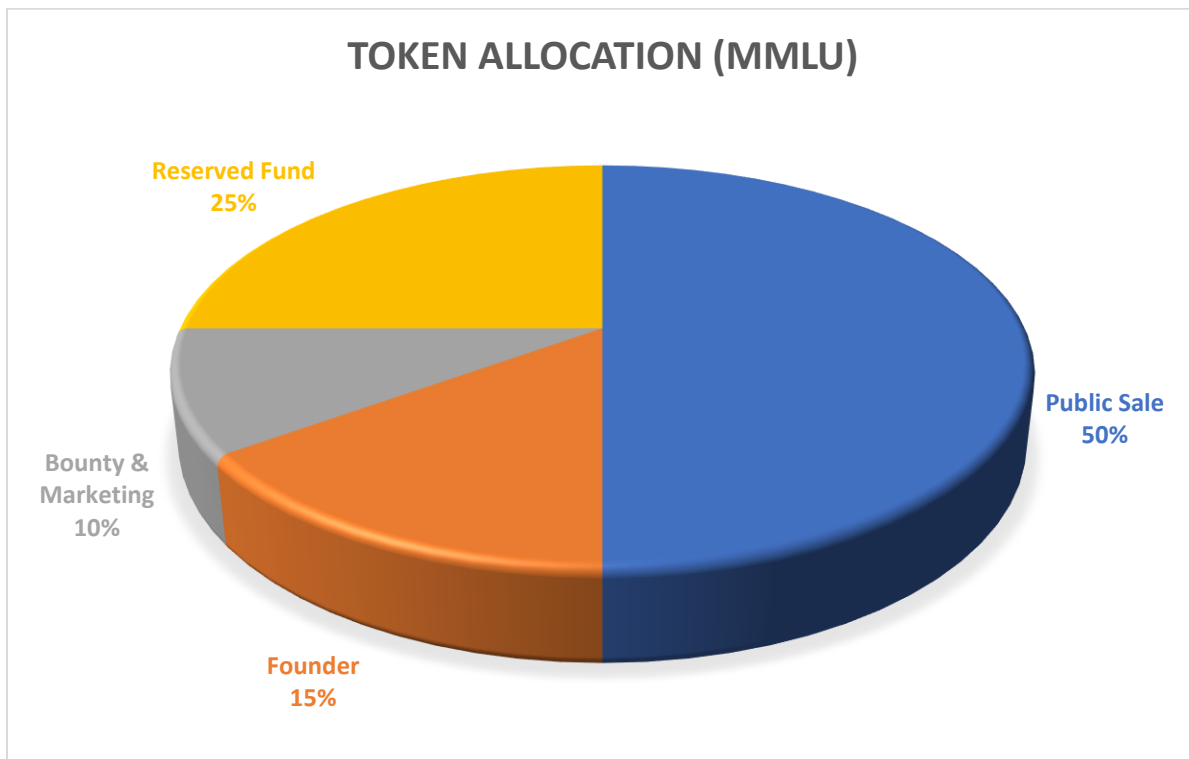

Name of Token	Memeluck
Symbol	MMLU
Total Supply	388,888,888,888 MMLU
Network	Ethereum (ERC20)
contract address	0xE0D3D0Ede7b5E7567D51F7b4Be13eBc28E290f84
Accepted currencies	ETH, USDT,
